emotionwood.com

Born from Nordic forests and shaped by generations of craftsmanship,
Emotionwood is the oldest producer of wood design panels in Estonia, where
nature and design meet in perfect balance.

Guided by skilled artisans and inspired by Nordic values of quality and
responsibility, Emotionwood creates architectural wood surfaces for spaces
where atmosphere and authenticity matter.

Each surface is created with care, precision, and deep respect for the material.
Every panel is **hand-crafted** with patience and intention, carrying the quiet
strength and beauty of natural wood into contemporary spaces.

Emotionwood
More than just wood.

- indoor use

- outdoor use

- saunas

Emotionwood uses carefully selected **high-quality woods from around the world** to create handcrafted wall and ceiling panels. Our wide range of materials and finishes allows us to offer one of the **most comprehensive and diverse collections** of architectural wood panels in the region.

Designed for homes, workplaces and wellness spaces, Emotionwood panels combine **refined aesthetics with dependable performance**.

Natural wood contributes to improved acoustics, thermal comfort and balanced indoor climate, creating spaces that feel both **beautiful and functional**.

Emotionwood is a **registered trademark** and all panel designs are legally protected within the European Union, ensuring originality and consistent quality for every project.

Made in Estonia. Defined by quality.

LED RGB Wall Panels

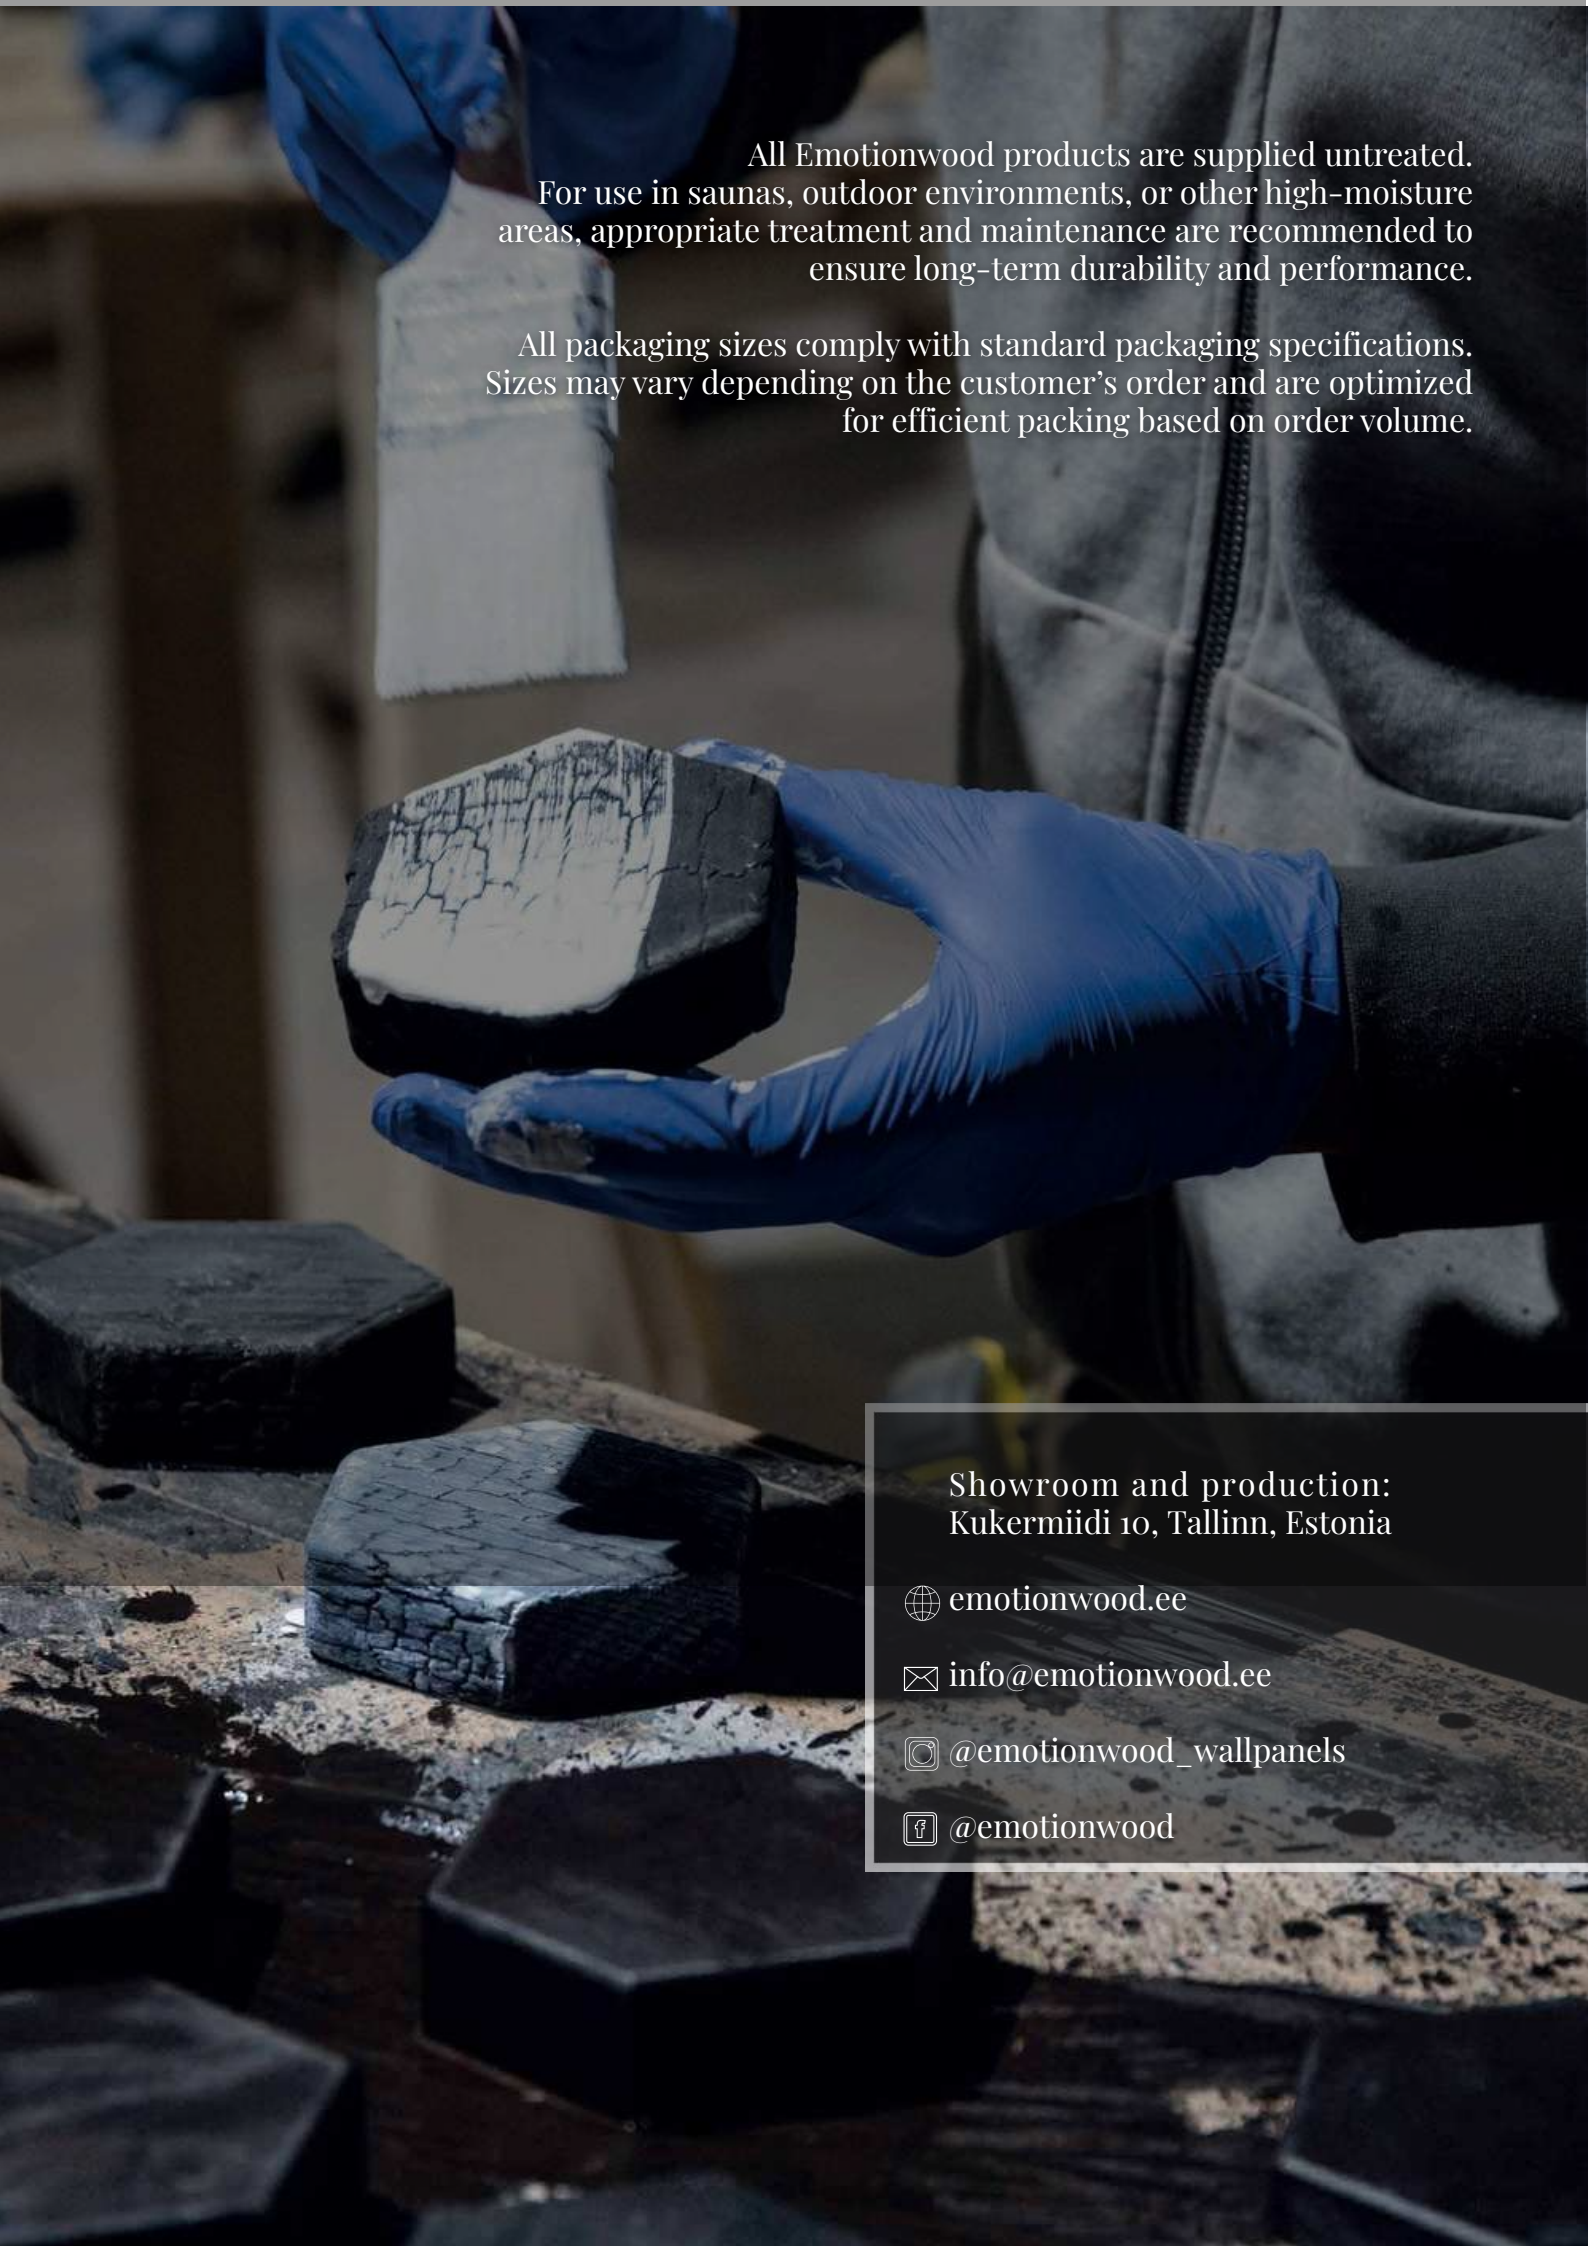

Enhance the beauty of natural wood with our integrated LED lighting solution. The light gently shines through the gaps and contours of the wooden patterns, highlighting the three-dimensional texture and creating a warm, elegant atmosphere perfect for saunas, spas and luxury interiors.

Light type: RGB LED
remote controlled
Coverage: Custom
Installation: Behind compatible panels
Light effect: Indirect ambient illumination

All Emotionwood products are supplied untreated.
For use in saunas, outdoor environments, or other high-moisture areas, appropriate treatment and maintenance are recommended to ensure long-term durability and performance.

All packaging sizes comply with standard packaging specifications.
Sizes may vary depending on the customer's order and are optimized for efficient packing based on order volume.

Showroom and production:
Kukermiidi 10, Tallinn, Estonia
